Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 6-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Helot et al (US Pat. 5,781,177).

Regarding claims 1, 4, 6-7 Helot et al disclose an information processing apparatus comprising: a display case 14 provided on a main body 10 of the information processing apparatus; a driving mechanism 32 which opens or closes the display case 14 on the main body 10; and means 40, 42 for remotely controlling operations of the driving mechanism 32 wherein the driving mechanism opens the display case 14 when a predetermined device of the information processing apparatus starts a predetermined operation wherein the driving mechanism 32 opens the display case 14 synchronous with a startup timing of a program in accordance with operation of the means 40, 42 for remotely controlling the driving mechanism; means 40, 42 for controlling display 28 of a display device 30 provided in the display case 14 associated with operation of the driving mechanism 32 wherein the driving mechanism 32 opens and closes the display device 30 with a speed set by an instruction from a user.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Helot et al (US Pat. 5,781,177) in view of Ohmi et al (US Pat. 5,956,194).

Regarding claim 5, Helot et al disclose all the subject matter of the claimed invention except for the means for remotely controlling the driving controls the driving mechanism via one of a wireless LAN, BlueTooth, an infrared-ray communication, and a telephone line. However Ohmni et al disclose the driving controls the driving mechanism via one of a wireless LAN, BlueTooth, an infrared-ray communication (see Ohmni et al's column 23, lines 30-45). Therefore, it would be obvious to one of ordinary skill to utilize the driving controls the driving mechanism via one of a wireless LAN, BlueTooth, an infrared-ray communication of Ohmni et al into Ishii's driving control to be convenient in new technology.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
